## People and Place Detail

### P1: How many people live in the defined study area?

Currently, there are 1,529 persons residing in the defined study area. This represents a decrease of 262 or 14.6% since 1990. During the same period of time, the U.S. as a whole grew by 21.0%. (see MAP page 4)

Study Area	1,791	1,490	1,529	1,504

### P2: Is the population in this area projected to grow?

No, between 2008 and 2013, the population is projected to decrease by 1.6% or 25 persons. During the same period, the U.S. population is projected to grow by 4.6%. (see MAP page 4)

In comparison, the study area population is *highly dispersed* within the overall area.

### P4: What is the overall level of diversity in the area?

Based upon the number of different lifestyle and racial/ethnic groups in the area, the overall diversity in the study area can be described as *somewhat low*. See D1 and D2 below.

### P5: How dynamic is the study area?

As the population density and overall diversity in an area increase, the environment becomes more complex and challenging. Given these factors, the study area dynamic level can be described as *about average*.

## Faces of Diversity Detail
